

## Avery Dennison™ V-Tool Fastening System

The new, highly reliable Avery Dennison V-Tool Fastening System efficiently applies loop-fastened tags to belts, handbags, wallets, sunglasses, sporting goods, kitchen utensils, appliances - and much more.

The V-Tool does not require goods to be penetrated with an insertion needle. Instead, the system has a dual hook and tag-holder applicator that meets the tag fastening needs of varying items. The unit's hook applicator wraps around selected areas of targeted items, such as a handbag's shoulder strap. The tag-holder applicator is designed to apply looped fasteners to smaller diameters, such as the zipper pull on a wallet or purse. Fasteners come in 2, 3, 4 and 5-inch lengths.

The labor-saving application process is completed in a single step. V-Tool tags up to 50 items with one clip of fasteners.

The system eliminates the need to use time-consuming, hand-applied fasteners, string, or dangerous pins to achieve loop-type fastening. The system's tamper-evident plastic loop fasteners have an arrow-and-barrel configuration that forms a strong mechanical lock. The fastener cannot be removed without destroying the loop or damaging the tags.

### Primary Applications:

The V-Tool system can be used to tag finished goods at the point of manufacture or for additional ticketing purposes at distribution centers and retail stores.

Ideal for tagging hard goods

The hook applicator applies loop-fastened tags to items such as:

- Belts and handbags.
- Sunglasses.
- Sporting goods.
- Apparel buttonholes.

The tag-holder applicator applies loop-fastened tags to smaller diameter items such as:

- Zipper pulls on purses, wallets, jackets...and more.
- Most kitchen utensils.
- Electric appliances.

# Avery Dennison™ V-Tool Fastening System

Fastener Solutions.

## Key Features and Benefits:

### Productive:

- Reduces labor costs.
- One-hand operation leaves the other hand free to grasp and tag targeted items.
- Tags 50 items with one clip of fasteners.
- Reduces operator fatigue associated with hand-applied fasteners.
- Lightweight (about 6 oz.) and ergonomic V-Tool design provides user comfort. Actuation trigger has a short reach, suitable for persons with smaller hands.

### Tamper Evident:

- The fastener cannot be removed without destroying the loop or damaging the tags.

### Durable:

- V-Tool's internal mechanical design prevents jamming and provides long, reliable service life.

V-Tool applies loop fasteners in a single-step operation: Just bring the system's applicator into contact with the targeted item, pull the trigger, and the application of a loop-fastened tag is complete.
